Risk Assessment

- Demo data for illustration — not a real supplier audit
- ⚠ Phone number not publicly available on 1688
- Overseas buyer readiness unclear from the public page — confirm export/ English in RFQ.

Before you sample

1. Order a paid sample of the exact SKU / color / material you intend to buy.

2. Ask for dated live photos or a short video of the same SKU on the production line.
3. Confirm written specs (dimensions, material grade, packaging) match the listing — screenshot both.
4. Keep the approved sample as the bulk-order reference; reject lots that diverge.
5. For first bulk, start at ~30–50% of intended MOQ after sample approval.
